### Policy Overview

The American Medical Association (AMA) Current Procedural Terminology (CPT®) book describes a consultation as a type of evaluation and management (E/M) service provided at the request of another physician or appropriate source, to either recommend care for a specific condition or problem, or to determine whether to accept responsibility for ongoing management of the patient's entire care or for the care of a specific condition or problem.

If, after completion of the consultation, the consultant assumes responsibility for the management of a portion or all of the patient's condition(s), the appropriate E/M procedure code for the location of service should be reported.

The purpose of this policy is to outline how the health plan evaluates CPT consult codes 99251-99255 and HCPCS codes G0406-G0408 for reimbursement, particularly identifying those that should have been billed at the appropriate level of subsequent hospital care.

CMS no longer recognizes codes 99241-99245 or 99251-99255 for Medicare payment; therefore, providers should not bill these codes for Medicare members. Instead, for Medicare members providers should report the appropriate E/M code payable under the fee schedule (including for visits that could be described by CPT consult codes), that identifies where the visit occurred and the complexity of the visit performed.

### Application

Professional and Inpatient Institutional Claims with the same member and same provider

### Reimbursement

Claim lines that contain an inpatient consultation procedure code billed within five days of another inpatient consult procedure are denied.

Services initiated by a parent and/or family and not requested by a physician or other appropriate source should not be reported using the CPT consult codes 99251-99255 or HCPCS consult codes G0406-G0408, but may be reported using appropriate office visit, hospital care, home service or domiciliary/rest home care codes.

CPT guidelines state that only one inpatient consult code should be reported by a consultant per admission. E/M services that occur after the initial consultation during a single admission should be reported using non-consultation E/M codes. The appropriate follow up codes for the hospital setting are CPT codes 99231-99233, and the appropriate follow up codes for the nursing facility setting are CPT codes 99307-99310.

**Documentation Requirements**

The following criteria apply:

- A written or verbal request for consult must be made by an appropriate source
- The request must be documented in the patient’s medical record
- The consultant’s opinion must be documented in the patient’s medical records
- The consultant’s opinion must be communicated by written report to the requesting physician or other appropriate source
